

Batchmaster II Metering System

Replacement Batchmaster II Display Screen Product Bulletin

Has your Batchmaster II Display Died?

The original Batchmaster II screen is now obsolete, costs more to repair, and is no longer available or supported than a newer generation display screen.

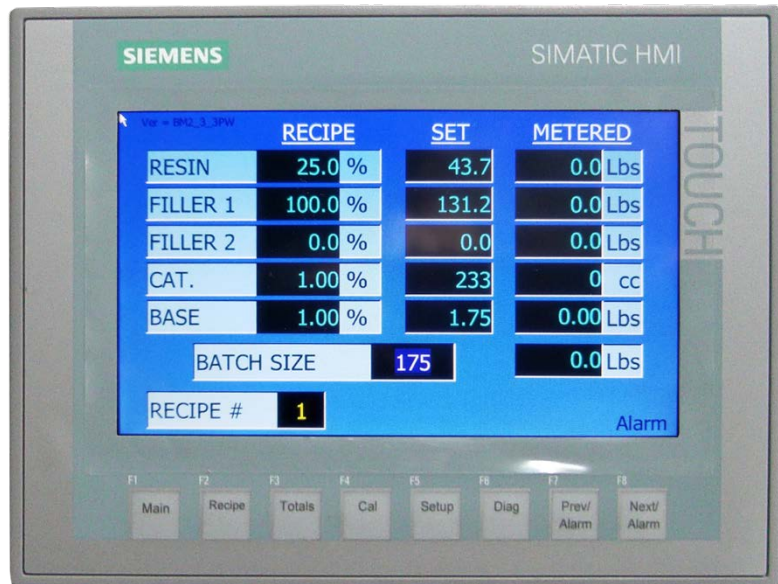

Avoid disruptions by replacing your old unit with a new display screen:

- Modern screen currently in production and supported by the manufacturer.
- Brighter, easier to read display
- Larger screen area
- Full color display
- Updated graphics
- Improved navigation
- Fits within the same cutout of the front operator panel for easy, simple “plug-and-play” replacement.
- Backward compatibility with existing software. Same screen options and information.

Batchmaster II metering systems take a lot of use and abuse, and inevitably, due to age and use – that outdated display screen will likely fail.

Replace it with a new, updated display before a failure disrupts your business!

Upgraded Display with New Interface

Batchmaster II Screen Replacement:
